

JUMP START PROMOTION

Oil prices are on the upswing, rig counts are increasing, and demand is quickly returning from COVID era levels...all signs pointing to a market recovery.

Electrolab wants to help you **JUMP START** your recovery efforts. While many competing companies are increasing prices and lead time, Electrolab is helping you by reducing lead times, and for a short time, offering a **2% discount** on all Model 2100 Digital Level Sensors (RU Flex, Stainless Steel and Fiberglass).

This 2% discount applies to all Model DLS 2100 configurations, including all Explosion Proof, Wireless and High-Level Shut-In (HLS) sensors. Due to its mechanical integration with the sensor, along with its isolated circuitry, including the HLS option with a sensor eliminates the need for additional emergency shut-in devices.
