

4 CHANNEL 4-20 mA SURGE SUPPRESSOR MODEL 2304

These transzorb based devices protect the current signal from excess voltage with respect to earth. These low leakage transzorbs do not affect the delicate currents present. They are rated 175 Watts (8-20 μ s). The PCB is 3.25" x 2.50", with attached ground strap and optional mounting brackets.

Connections are made by 2 Wago 8 pin, 2 part spring loaded connectors.
